D-Link Launches 24-port L3 Stackable Management Switch

New DGS-3627G Switch provides SMBs and Enterprise environments with a cost-effective and powerful switching solution

Johannesburg, 16 October 2007 – Businesses requiring a high performance, cost-effective Switch have had their needs addressed following the introduction of the DGS-3627G 24-port Layer 3 Stackable Management switch from D-Link, the end-to-end networking solutions provider for consumer and business. With its advanced feature set and scalability, the DGS-3627G is an ideal long-term business investment for SMBs and Enterprises. The latest addition to D-Link's popular xStack range, the DGS-3627G strengthens D-Link's position in the market as a developer of network solutions for businesses of all sizes.

Flexibility is a key feature of the DGS-3627G Switch, which is a fully managed Layer 3 switch that provides 24 SFP ports and 4 Combo 1000BASE-T Gigabit Ethernet ports. The DGS-3627G also provides virtual stacking functionality via D-Link SIM technology allowing up to 32 units to be managed via single IP address, meaning the switch can be centrally managed, saving on valuable resources.

The DGS-3627G's 24 SFP ports means that it provides a full-fibre environment for long distance Ethernet infrastructure which is suitable for the FTTx and MAN (Metropolitan Area Network). 10 Gigabit Ethernet open slots in the back-panel can be plugged with 10GE XFP modules for fibre uplinks or 10GE copper modules for inter-device connection. The DGS-3627G is highly scalable too, as it can be stacked with 10 Gigabit copper modules providing up to 40 Gigabit stacking bandwidth, or can be stacked with DGS/DXS-3300 series switches with D-Link SIM technology.

With support for IPv4/IPv6 static and dynamic routing and a plethora of advanced security and enhanced QoS features, the xStack DGS-3627G provides both performance and advanced security features often associated D-Link Switches. The inclusion of D-Link's ZoneDefense also integrates the switch with a central NetDefend Firewall to enable Proactive Network Security, by preventing viruses from spreading through the network, thus thwarting harmful network attacks.

Karien Wood, SA Marketing Manager, D-Link said: "D-Link has always offered business customers a wide range of solutions to meet their needs. This latest addition to the xStack range reinforces D-Link's commitment to providing cost-effective, feature-rich and powerful networking solutions. With its scalability and robust security features, the DGS-3627G strengthens D-Link's position in the market as a developer that caters for the business market's every network need."

Price and Availability

The DGS-3627G is available now through the company's network of value-added resellers and distributors. The DGS-3627G has a recommended retail price of R27,869.00.
