

**D-LINK OFFERS LIMITED LIFETIME WARRANTY FOR
BUSINESS SOLUTION PRODUCTS TO AFFIRM
CONTINUOUS COMMITMENT TO PROVIDING
QUALITY PRODUCTS AND SOLUTIONS**

Johannesburg, 1 October 2009 – D-Link, the end-to-end computer networking solutions provider for consumers and businesses, today announced that its business solution product lines, which offers one of the industry's most comprehensive product portfolios, will now ship with Limited Lifetime Warranty (LLW) to give its customers greater confidence and assurance of quality products purchased.

Beginning 1 October 2009, D-Link business solution products purchased from D-Link's authorized reseller or distributor will be covered by this LLW for as long as the product is owned by the original customer, or up to a five year period after the product's discontinuance, whichever occurs first. This new warranty will apply across D-Link's business solution products which include unmanaged, smart and managed switches, business wireless, and firewall security appliances.

"Warranty, product support and product quality have always been areas of concern for many businesses," said Tobie van Schalkwyk, D-Link South Africa Country Manager. "With this limited lifetime warranty, we hope to provide our customers the ability to confidently plan their network development roadmap for the future, without having to worry about wastage of previously invested resources or product quality."

Besides providing assurance of support, the LLW also means the assurance of quality. Quality is an area D-Link has constantly focused on in ensuring the efficiency of D-Link's value chain. When it comes to providing quality, D-Link abides by a set of rules, and it is not limited to just product quality, but also service quality, documentation quality, process quality, sales force quality, marketing quality, communication quality, and more.

With this new LLW specially designed for its business solution products, D-Link is affirming its commitment towards providing quality products and after sales support to build and increase customers' confidence towards D-Link's products and solutions.
